SUMMARY

Flutter developer who has worked on 10 mobile apps (5 published — links below), from greenfield launches to taking over other teams' code, including a migration from native Android (Java) to Flutter. For the last three years I have been the sole mobile developer on a product team: I design the architecture, choose the stack, align on API contracts with the backend team and ship features from mockup to the stores. Three years in one domain — platforms for self-employed contractors: onboarding, documents, gig contracts, payouts, tax receipts.

I completed a 379-hour Go developer program (Yandex Practicum) and I am expanding into full-stack: Go backends and LLM integration in my own projects. Before development, I spent 5 years in project management, including leading a team of 6, so I understand business goals and work well with clients.

SKILLS

Flutter · Dart · Riverpod · GoRouter · Dio · REST API · WebSocket / Socket.IO · Firebase · Push notifications · Clean Architecture · MVVM / MVC / MVP · SOLID · Unit & integration tests · SQLite / Drift · SQL · PostgreSQL · Go · LLM integration · Docker · CI/CD · Git · Figma · App Store, Google Play, RuStore releases · Native-to-Flutter migration · Taking over existing codebases · Team leadership

EXPERIENCE

Mobile Developer · ITmuse

Dec 2023 – Present

The sole mobile developer on the product team of a platform for self-employed contractors: the mobile side of three products, from architecture to release and support.

- **Contractor Portal app** (Личный кабинет исполнителя) — migrated a native Android app (Java) to Flutter with no loss of functionality, shipped it on iOS and Android with a new design; now leading major version 3.x and moving the architecture to Riverpod.
- **GSR Rabota** (GSR Работа), a gig-work app — built from scratch as the sole mobile developer: sign-up and documents, SMS-based e-signature, shift booking, wallet and payouts, tax receipts for the self-employed, real-time support chat.
- Built an internal messenger for support agents: real-time chat, attachments, push notifications, multi-environment builds.
- Designed the architecture of the new apps (feature-first, Clean Architecture, Riverpod) and aligned on API contracts with the backend team.
- Built the networking layer with Dio (interceptors, error handling, logging), real-time features with Socket.IO and push via FCM; integrated Firebase Analytics, Crashlytics, AppMetrica, Remote Config; wrote unit and integration tests for core logic and refactored legacy code without halting delivery.

Stack: Flutter, Dart, Riverpod, GoRouter, Dio, REST API, Socket.IO, Firebase, AppMetrica, Drift/SQLite, WebView, Figma

Flutter Developer · Hermon Group

May 2025 – Oct 2025 · project work alongside main job

- **Zhabby** — a short-video social network that rewards activity; published on the App Store and Google Play. One of two developers: built every screen from Figma designs and, in some sections, integrated APIs and state management.

Flutter Developer · Teleport

Sep 2023 – Aug 2024 · part-time

- **Q-Working** and **Jobline** — contractor apps built from scratch: onboarding for self-employed contractors, gig contracts, documents, receipts and payouts with tax payment.
- **METRY** (utilities & property management app) — took over the app from another team, ramped up on the inherited codebase and extended its features; **ImPay Bonus** — early stage: UI, state, first API methods.

Flutter Developer · Greenway — Feb 2022 – Oct 2023

- **Mealhub** (restaurants on a map, table booking, food ordering) and **GreenFeed** (feed catalog and animal ration calculator) — built UI from Figma designs, Google Maps API, REST integration, support and new features.

Head of Department, Project Manager · Yuzhno-Sakhalinsk City Development Agency (municipal) — Feb 2015 – Nov 2020

- Led a team of 6: social media strategy for the city administration, launched and ran its Telegram channel, handled residents' inquiries.
- Ran city projects from idea to launch: specs for contractors, budgets, presentations to leadership; acting head of the project office.

PUBLISHED APPS

GSR Rabota (GSR Работа) — built from scratch, sole mobile developer · App Store · Google Play
apps.apple.com/ru/app/id6771076516 · play.google.com/store/apps/details?id=ru.gsrrabota.mobile

Contractor Portal (Личный кабинет исполнителя) — Android → Flutter migration, v3.x · App Store · Google Play · RuStore
apps.apple.com/ru/app/id6748441402 · play.google.com/store/apps/details?id=com.crystalglaive.employee · rustore.ru/catalog/app/com.crystalglaive.employee

Zhabby — all screens, API · App Store · Google Play
apps.apple.com/ru/app/id6758106499 · play.google.com/store/apps/details?id=com.metaparadox.zhabby

Mealhub — restaurants, booking · App Store · Google Play
apps.apple.com/ru/app/id1640713837 · play.google.com/store/apps/details?id=group.mealhub.app_main

GreenFeed — feed catalog · App Store · Google Play

PROJECTS (GO + LLM)

- **sitefarm** — a Go pipeline: NOAA open data → LLM-written text → fact checks by a second model and by code → static site (~2,100 pages), with model-spend budget controls. GitHub
- **Terroir** — a personal wine assistant: Go, PostgreSQL, PWA, LLM chat. GitHub
- **TapReply** — B2B SaaS for replying to customer reviews: Flutter + Go + PostgreSQL. tapreply.net

AI-ASSISTED DEVELOPMENT

- Use an IDE agent (Veai) daily; also used Cursor and GitHub Copilot; same plan → diff → tests workflow with Claude Code and Codex.
- Write agent instructions in the repo and custom skills; use MCP: the IntelliJ server plus my own MCP server written in Python.
- Run parallel agents in separate git worktrees; I verify output via tests, diff review and code-level checks.
- LLM in production code: generation and fact-checking in sitefarm (Yandex AI Studio), chat in Terroir on Go.

EDUCATION

- **Go Developer** — Yandex Practicum, 2026; 379-hour program: Go, REST API, SQL, concurrency, Docker, CI/CD.
- **Cross-Platform Mobile Development with Flutter** — Ufa State Petroleum Technological University, 2022; 371-hour program.
- **Management** — Sakhalin State University, 2011.
